Professional Profile

Second-year Creative Computing student at the University of the Arts London, building a foundation in programming, design and research-driven development. Proficient in Python, with growing experience in JavaScript and Processing, and UX tools such as Tinkercad and Blender. Passionate about the intersection of art, technology and design through code, with a growing interest in user-centric experiences. Eager to contribute to research efforts that challenge assumptions, support team thinking, and help shape experiences for all users.

Education

Work Experience

Mentor - Copenhagen Youth Project:

April 2022 - June 2023

- Built trust-based relationships with diverse youth, developing strong active listening and qualitative observation skills essential for research-driven insight gathering
- Conducted informal needs assessments and ethnographic-style observations to identify behavioural patterns and user needs, supporting tailored development plans for 15 participants
- Demonstrated patience and adaptability in a dynamic, fast-paced setting, honing communication and leadership qualities

Sales Advisor - River Island:

July 2023 - June 2024

- Engaged with 100+ customers weekly, gathering real time feedback to inform store layout and product placement decisions, demonstrating a commitment to customer-centric solutions
- Communicated user pain points and improvement ideas to management, contributing to iterative enhancements, elevating customer experience
- Exceeded personal sales targets by 5-10%, illustrating analytical and result-driven work ethic

Experience Specialist - Samsung KX:

June 2024 – Present

- Present complex technology products to diverse audiences, simplifying key points to enhance user understanding and engagement
- Utilise personalised customer service techniques to build personalised customer relationships, resulting in over £20,000 in sales since joining
- Participate in monthly one-to-one meetings with team leads to review performance, discuss challenges, and identify areas for continuous improvement
